

Council Motion D-1 Social Science Plan Team

June 10, 2018

I move that the Council expands SSPT membership by a seat or two to include individuals with expertise in local and traditional knowledge and initiate a call for nominations with the intent of appointment during the October Council meeting.

In addition, the Council requests the SSPT consider comments provided by the SSC at their next teleconference or meeting.

The Council requests that the SSPT consider drafting terms of reference and review whether other fishery management council have bodies similar to a Social Science Plan team to incorporate social and economic information into decision making.
